## **I. OBJECTIVE**

This document sets the Minimum Baseline Security Standards of the Bank for Password Configuration. It is important all connections into Information Systems are authorized, properly managed, and secured. Also, to educate all users of systems and applications on the characteristic of a Complex/Strong Password and on how to securely maintain and manage passwords.

## **II. SCOPE**

This guideline applies to all users (i.e., Bank employees, temporaries, consultants, and third-parties) whether you are an end user or a system administrator having a username and password to at least one system or application.

## **III. RESPONSIBILITIES**

### **IT Security Administration Unit Head**

Formulate Password Configuration Minimum Baseline Security Standards to provide guidelines on how to securely maintain and manage complex/strong passwords.

### **IT Security Staff**

Ensure that the guidelines defined by the IT Security Administration Unit Head are fully implemented and monitored. They shall handle all technical issues with regard to password configuration.

### **Chief Information Officer (CIO)/IT Head**

#### **Sr. Management**

#### **Information Technology and Communication Steering Committee (ITCSC)**

#### **Board of Directors (BOD)**

Shall review and approve the guidelines formulated by the IT Security Administration Unit Head.

### **All Employees of the Bank**

They must abide with the Password Configuration guidelines set herein to ensure a secure network for CSBank.

#### IV. STANDARD POLICY

<b>Creating a Complex/Strong Password</b>	
<i>Complex Password should -</i>	<ul style="list-style-type: none"> <li>✓ All passwords must have at least eight (8) characters.</li> <li>✓ Must contain both upper and lowercase alphabetic characters. (e.g. A-Z, a-z)</li> <li>✓ Must contain at least one numerical character (e.g. 0-9)</li> <li>✓ Must contain at least one special character (e.g. ~!@#\$%^&amp;*()_-+=)</li> </ul>
<i>Complex Password should not -</i>	<ul style="list-style-type: none"> <li>✓ Spell a word or series of words that can be found in a standard dictionary.</li> <li>✓ Spell a word with a number added to the beginning and the end.</li> <li>✓ Must not be based on any personal information such as user id, family name, car plate number, pet, birthday, etc.</li> <li>✓ Must not employ passwords like "CSB1Jan" in January, "CSB1Feb" in February.</li> <li>✓ Must not construct passwords that are identical or substantially similar to password that they had previously employed.</li> </ul>

\*A **Complex Password** is defined as a password that is reasonably difficult to guess in a short period of time either through human guessing or the use of specialized software.

<b>Maintaining your User ID and Password</b>
<i>Do not share your Password with Anyone for any reason.</i>
<i>Change your Password upon indication of compromise.</i>
<i>Avoid reusing a Password.</i>
<i>Avoid using the same Password for multiple accounts.</i>
<i>Do not write down, display, printing your Password or store it in an insecure manner.</i>
